

CABLE MANAGEMENT

SIDING CLIPS - VINYL AND ALUMINUM SIDING CLIPS SECURELY FASTEN WIRES

Features:

Vinyl and aluminum siding clips feature a unique universal design for both horizontal and vertical cable installation. In horizontal applications, the cable is held securely beneath the siding lip. For vertical installations, the clips provide an angled, enclosed channel around the edge of the siding overlap to hold cable securely against the wall surface.

- Securely Fastens RG-6, RG-59 regular, dual or quad shielded cable.
- Installs in seconds without tools.
- Weather-proof, ultraviolet (UV) stabilized material protects against deterioration.
- Allows siding's weather seal to stay intact.
- Insulated to protect against shorts during installation / removal.
